SEPA DAT ONBOARDING

How to Go On Call with the Noggin App

Put yourself on call from your phone

Updated **October 12, 2026**

Pretty straightforward

Putting yourself on call in the Noggin app is quick once you get past one hiccup: a domain you have to type exactly (step 3).

Your phone may differ

A few steps may come in a different order depending on your device, but the broad strokes stay the same.

Download Noggin app → **Log in** twice → **Domain** type it exactly → **Shifts** yellow button → **Confirm** you are on call

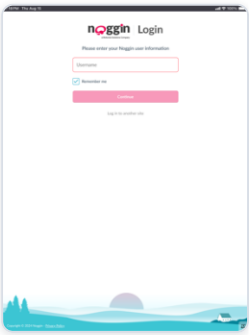

1 Download the Noggin app

Get it from your phone's app store.

2 Log in

Open the app and log in with the same email address you use for Volunteer Connection. It then sends you to the Volunteer Connection page, where you log in again.

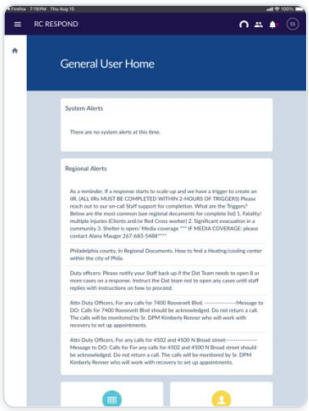

3 Enter the domain exactly

At some point the app asks for a domain. It is case sensitive: no capitals, no spaces. Type:

```
ops-rcview-redcross
```

4 Let it finish

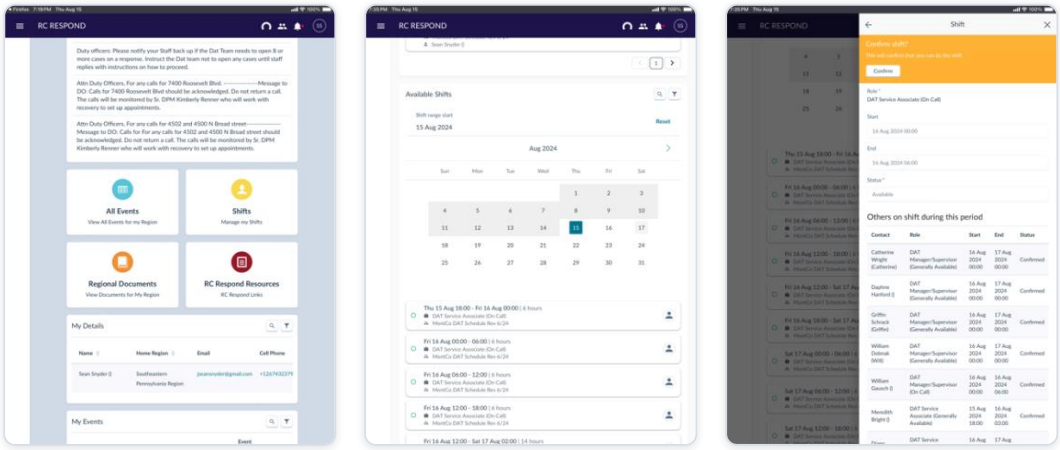

The app jumps back and forth between your browser and the app for a bit. When it is done you see the RC Respond home screen.

5 Tap Shifts and pick an On Call shift

Scroll down and tap the yellow **Shifts** button. You see your current on-call shifts; look for **Available Shifts**.

Tap a shift that fits your schedule. Choose ones marked **(On Call)**, not (Generally Available), which is the default. Then tap **Confirm** at the top right. You are now On Call.

Left to right: Shifts, Available Shifts, Confirm. Your screens may vary by device.

Having trouble? You are not alone.

It can be confusing. Reach out to your coordinator to walk you through it. It really helps Duty Officers to have people signed up as On Call.

Thank you for all you do!
