Job Tool: Reunification Helper Tool Instructions

Disaster Cycle Services Job Tools
DCS JT Respond/Reunification

Introduction

The *Reunification Helper Tool,* hereafter referred to simply as the "Helper Tool," is a customized Excel spreadsheet that Reunification workers can use on a laptop to record many registrations at one time without the need for internet connectivity. Each Helper Tool can accommodate 1,500 registrants.

The Helper Tool provides a quick way to register clients without having to distribute and collect paper forms. It can be found in the Files section of the Global National Disaster Reunification Group and placed on a flash drive or directly onto a computer. It cannot be printed.

This job tool should be used in conjunction with the following doctrine:

- Reunification Standards and Procedures
- Job Tool: Reunification Services
- *Reunification Helper Tool*

Helper Tool Instructions

- Only one Reunification worker should be assigned to a Helper Tool
- Each worker should download and save a copy of the *Safe and Well Helper* in .xls format
- Columns with capitalized bold headings and red asterisks (*) are required information
- Do not change any headers in the Helper Tool
- Register one client at a time to ensure that client information remains confidential
- Ensure that clients provide informed consent to having their names registered
- Ensure that all fields in columns with required information are completed for each client registration
- Although Column G asks for the client's nationality, it is important to remember that the Red Cross provides services regardless of a person's nationality, citizenship status, etc., and to reassure clients of this fact if necessary
- Be sure to enter Yes or No for client preferences to share information (Columns X, Y and Z)
  - Only one column can have Yes as the preference.
  - The other 2 columns must have No as the preference.

At the end of each day, shift, or as directed by a supervisor:

- Email the Helper Tool to safe@redcross.org.
  - Include the name of the DRO or other event, and the name of the Reunification worker who completed the Helper Tool, in the subject line of the email
  - The information will be incorporated into a data base with other registrations from the event
  - If more than one Helper Tool is used, do not combine the registrations.
- Keep a copy of the Helper Tool on the DRO (or locally, if being used for a non-DRO event) to be searched if inquiries are received about missing persons
  - Check Columns X, Y and Z for client preferences for sharing information outside Red Cross
- Delete the Helper Tool from the computer when the DRO or local event has been completed
